## Weather Trackers

Over a period of three weeks, student's in Mrs. Becker's science class observed the weather of their city. They recorded rainfall, atmospheric pressure and wind speed. The following data was collected:

| Day 1 | Day 2 | Day 3 | Day 4 | Day 5 | Day 6 | Day 7 |

1. What is the wind speed, temperature and rainfall on day 7 ?
2. Did it rain on day 20? Yes $\bigcirc$ No $\bigcirc$
3. Which of the following weather instruments were not used for the observation ?
4. Anemometer $\bigcirc$ Rain gauge $\bigcirc$ Wind vane $\bigcirc$ Barometer $\bigcirc$ Thermometer $\bigcirc$
5. Which day was the warmest ?
6. Which day was the coldest?
7. Which day was the least windy ?
8. Which day was the windiest ?
9. Calculate the total amount of rainfall during the period of observation (3 weeks).
10. Draw a graph representing the wind speed over the first 7 days.
