

# BUTTERFLY Life Cycle

Cut both circles out, attach them together through the center with a metal fastener.

# BUTTERFLY facts

- Butterfly eggs are laid on \_\_\_\_\_
- Larva (caterpillars) \_\_\_\_\_ everything they see!
- Caterpillars molt or shed their skin at least 4 or 5 times in order to \_\_\_\_\_
- A caterpillar changes into a \_\_\_\_\_ where it will complete its metamorphosis
- In about 9 to 14 days an adult \_\_\_\_\_ emerges from its chrysalis
